Winning Team (Most Creative)

Chicago Design Museum (2012)
Marketing Team

2 Night Stand (2011)
Participant

Hair Down to There (2009)
Art Exhibition - Koehline Art Museum
Artist

Freelance Sr. Experience Designer at DigitasLBi.
Consultant at Wilson Dow Group and Mast Mobile.
Seeking opportunities in design, front-end development,
illustration, and teaching.

Worked with multidisciplinary teams to design new ways to
interact with the world through physical and digital products
and services.

Designed websites, identity systems and user interfaces for
various web/mobile applications.
Some projects also needed front-end development assistance.

Created and maintained various websites for
flagship and sister brands, improved organic traffic
through seo efforts, created all branding and
identity materials for clients such as Microsoft and Adobe.

Testing my communication skills I travelled and studied
Mandarin while teaching reading, writing and spoken
English in Shijiazhuang, China.

Using Divvy's data we created a satirical "dating site" that
pinpointed the best time to meet someone at a Divvy
Station. Practical uses for the site include locating stations
with a gender imbalance or pinpointing those close to
high crime areas.

As a volunteer on the Chicago Design Museum marketing
team, I was responsible for updating the site's content and
functionality as well as overall maintenance.

As part of 2 Night Stand, my group designed a series of
posters regarding the different types of Zombie outbreaks
for the Zombie Research Society.

I participated as an artist in this curated art show with
more than 50 other women artists. Together we created
pieces concerning women and the world's relationship to
our hair, as a means of expression or rebellion.
